

Dr.-Ing. Jörg Heuer

*Program Manager,
Siemens AG*

Dr. Ing. Jörg Heuer received the Dipl.-Ing. degree in Electrical Engineering at the Friedrich-Alexander University of Erlangen, Germany, 1997, with a specialisation on digital signal processing and high frequency engineering.

In 2003 he received his PhD on meta data processing and coding from the Friedrich-Alexander University of Erlangen. He joined the Corporate Technology of Siemens AG in 2002. He has been actively contributing to the ISO and IEC standardisation since 1999, and has been co-editor of several standards.

In 2004 he has been awarded as “Inventor of the Year 2004” by Siemens. Since 2007 as Program Manager he is responsible for “Embedded Networks“. Beside the core technologies for distributed automation by embedded networks this comprises the application of embedded networks in the respective application domains in industry, energy and building automation. His team is active standardisation activities ranging from V2G, Smart Grid in ISO/IEC to Web of Things in W3C and coordinates Siemens activities in several application projects such as eNterop, In2VPP, SecVer or SysDL2.0.
